

Teeny weeny 'puter things

Gad but I have a cool job sometimes. Right now, it's playing with teeny-tiny components, some of which I want to remember here (just in case I feel like building some strange bots of my own). So... cool little [gumstix](#) computer, [C328RS](#) camera, and a cute little [5dof imu](#). Not that this is fun or anything, but... well, it's fun okay. Although the soldering-related screaming and sticking-plaster bonanza are bound to start soon...
